

No Child Left Behind, Title I, A and *IntelliTools® Classroom Suite*

Title I, Part A, of the No Child Left Behind Act is intended to help ensure that all children have the opportunity to obtain a high-quality education and reach proficiency on challenging state academic standards and assessments.

The largest federal program supporting elementary and secondary education (with Fiscal 2005 appropriations of \$12.7 billion), Title I, Part A, targets districts and schools where the needs are greatest. The program focuses on promoting schoolwide reform in high-poverty schools and providing students with access to scientifically based instructional strategies and challenging academic content.

IntelliTools Classroom Suite ensures that all K–grade 8 students, including struggling readers, reluctant writers, English language learners, and students with special needs, receive an individualized approach to curriculum instruction. It is a hands-on tool for practicing activities that are sequential, intentional in skill building, and provide the repetition that struggling students need to master skills.

Title I, Part A Reform Strategies

All students have opportunity for high-quality education

All students reach proficiency on state academic standards

Based on effective methods and instructional strategies

Extra instruction in early language arts, math

Providing Supplemental Educational Services

***IntelliTools Classroom Suite* Solutions**

IntelliTools Classroom Suite adheres to the principles of differentiated instruction and individualized learning, supporting all learning styles and incorporating graphics, animation, onscreen manipulation, speech output, and music. The program is also fully accessible for special needs students using scanning or an IntelliKeys adaptive keyboard.

Using *IntelliTools Classroom Suite*, students practice curriculum-based activities in a wide variety of formats across multiple subject areas. The activities and flexible templates give students practice that is independent, self-regulated, engaging, content-based, leveled to build skills, monitored for success, and reported for assessment.

IntelliTools Classroom Suite is the culmination of several development projects funded by grants from the National Science Foundation and the National Institutes of Health. Research focused on student interaction with curriculum software, with the goal of creating high-quality software that is engaging for students, addresses multiple learning styles, and meets or exceeds national and state curriculum standards.

Teachers can target their students' critical learning needs using their state's content standards and *IntelliTools Classroom Suite's* aligned practice activities in language arts and math to gauge performance. The program's activities have embedded answer-tracking, helping teachers identify patterns of errors and tailor remedial instruction accordingly.

IntelliTools Classroom Suite is an excellent application for strategies such as extended day (before- and after-school programs), extended year, and summer programs to increase learning time. Students needing extra help can use it as a practice tool, as it provides the instruction and repetition that struggling students need to achieve mastery.

Additional Classroom Benefits of *IntelliTools Classroom Suite*

- *IntelliTools Classroom Suite* provides strong scaffolding to support English language learners, incorporating recorded speech, talking text for auditory support, word prediction to access newly learned vocabulary, and more.
- *IntelliTools Classroom Suite* activities can be correlated to state content standards across grade levels and subject areas, enabling all students to meet the standards.
- Teachers can use its real-time embedded assessment to decide what practice the student needs next and tailor instruction accordingly.
