

CLASSROOM SUITE

by INTELLITOOLS®

Systematic, explicit instruction in a flexible environment

Classroom Suite is a unique software intervention tool to help students in grades PreK–5 achieve mastery in reading, writing and mathematics. Classroom Suite provides students with explicit instruction, constructive practice and embedded assessments to allow teachers to gauge progress and individualize instruction for their students.

Classroom Suite can be used for:

- Supplemental Instruction — target specific skills for struggling students.
- Response to Intervention (RtI) — a Tier 2 or 3 intervention solution.
- Curriculum Access — for struggling students with learning, cognitive, or physical disabilities.

Classroom Suite supports the principles of Universal Design for Learning (UDL):

- Multiple Means of Representation - students experience concepts through text, graphic, and sound instruction.
- Multiple Means of Expression - students have a variety of methods to demonstrate concept mastery.
- Multiple Means of Engagement - computers provide information in an engaging format. Information is presented at the student's learning pace keeping the interest level high.
- Classroom Suite is a flexible learning tool that allows teachers to assess students and assign activities at the student's level of readiness.
- Classroom Suite activities provide immediate scaffolded (auditory and graphic) feedback to students as they learn concepts.
- Clearly defined activity sequences provide teachers support in determining what objective or skill a student should master next.

Classroom Suite provides:

- Direct instruction for all students
- More than 50 curriculum templates aligned to state and national standards
- Simple wizards for modifying templates in minutes; no authoring required
- Formative assessment and data-gathering tools for easy student reporting
- Classroom Suite is an ideal tool for creating reading interventions based on DIBELS™ screening data.
